

Hostel Room & Complaint Management System

About us

We are first-semester students of the Artificial Intelligence Department at Pak-Austria Fachhochschule: Institute of Applied Sciences and Technology (Pak-IAST).

As part of our Fundamentals of ICT Lab course, we worked as a team to develop this semester project and apply practical ICT skills.

Our Team

IHTISHAM

HASEEB

IFTIKHAR

Introduction

- Hostel facilities are an essential part of student life
- Students frequently face room-related issues
- Manual complaint systems cause delays
- ICT-based solutions improve efficiency

Motivation of the Project

- Students often experience delays in complaint resolution
- Manual systems lack proper tracking and transparency
- Repeated hostel issues are not properly analyzed
- Motivation to apply ICT tools to solve a real-life problem
- Desire to improve efficiency and student satisfaction

Objectives

Objective 1

Provide digital
complaint submission

Objective 2

Maintain organized
complaint records

Objective 3

Track complaint status
effectively

Objective 4

Improve hostel
management efficiency

Proposed System Overview

- Web-based hostel complaint management system
- Online complaint submission by students
- Centralized complaint data storage
- Status tracking: Pending, In Progress, Resolved

Tools & Technologies Used

- This project uses multiple ICT tools for effective development and documentation.
- MS Word, PowerPoint, HTML & CSS, Excel, Access, and GitHub were used to complete different project tasks.

TOOL USED

1

MS Word

- Used to prepare project proposal
- Used to write final project report
- Created structured academic sections
- Ensured proper formatting

2

MS PowerPoint

- Used to design professional presentation slides
- Explained project overview and objectives
- Presented tools, features, and conclusion
- Used for class presentation and viva

3

HTML & CSS

- Used to design static hostel complaint website
- HTML used to create structure of web pages
- CSS used for layout, colors, and fonts
- Designed pages such as home and complaint form

TOOL USED

4

MS Excel

- Used to analyze hostel complaint data
- Applied sorting and filtering
- Created tables and charts
- Identified complaint trends

5

MS Access

- Used to design structured database
- Created tables for complaints and students
- Stored and managed complaint records
- Maintained data organization

6

Git & GitHub

- Used for version control of project files
- Stored website and documentation files
- Helped in team collaboration
- Ensured secure project storage

Key System Features

- User-friendly complaint submission form
- Complaint status tracking system
- Admin dashboard for monitoring
- Organized and searchable records

Real-Life Implementation

- Can be implemented in university hostels
- Students submit complaints online
- Administration resolves issues efficiently
- Improves transparency and response time

Expected Outcomes

- Efficient hostel complaint management
- Reduced complaint resolution time
- Improved student satisfaction
- Better data management

Conclusion

- Practical solution to a real-life problem
- Effective use of ICT tools
- Improves efficiency and transparency
